

Cut out each example and help your child decide whether the situation is telling or tattling. Paste the example under the correct column.

We are Telling when we need the help of a trusted adult because someone is in danger or can get hurt. Tattling is when we tell a trusted adult about something that happened, but we can fix it on our own.

For examples of Tattling ask your child:

- Is that something you can fix on your own?
- What are some ways you can solve this problem on your own?

For examples of Telling ask:

- Is someone in danger or can get hurt?
- Do they need the help of a trusted adult?
